

# Full Job Description

*Ultratec, Inc., located on the west side of Madison, is the worldwide leader in developing new technologies for the deaf and hard of hearing population. Today, our equipment is recognized as the standard for excellence in text telecommunications. Ultratec engineering is seeking a Software Engineer to join our growing product development team.*

*This full time position offers a Monday-Friday first shift schedule, with overtime as necessary, a competitive starting wage, a full benefits package, and a casual work environment within a state-of-the-art building.*

*Ultratec's most recent endeavor, the Captioned Telephone (CapTel), continues to demonstrate how we have revolutionized the industry with cutting edge products that transform the lives of individuals around the world.*

**Position Overview:** Ultratec is looking for a Software Engineer to join our development team and be an integral part of our growing research and development responsibilities. This individual will participate in the design, architecture, and implementation of many different server / client based applications that support our CapTel platform. The main duties for the Software Engineer are development of .NET software applications, debugging, and working with the test lab and quality assurance to ensure the design criteria meets expectations.

## **Qualifications:**

- Bachelors degree in Computer Science, Computer Engineering, Electrical Engineering, or equivalent work experience in a related field.
- 3+ years of experience in Software Engineering / Software application development.
- Proficiency with MS Visual Studio environment.
- Proficiency with Microsoft .NET (C# / VB.NET).
- Working knowledge of Windows Sockets.
- Working knowledge of Finite State Machines.
- Working knowledge of SQL is a plus.
- Working knowledge of C++ and Java is a plus.

## **Other:**

- Exceptional engineering, problem solving skills.
- Strong written and verbal communications skills across functional teams.
- Demonstrates initiative and can work independently or in a small development team.
- Knowledge of software testing practices and tools.
- Ability to create high level software design documents and requirements.

***All qualified applicants will receive considerations for employment without regard to sex, race, color, national origin or ancestry, age, disability, marital/veteran/student status, physical appearance, sexual orientation, political beliefs, religion, genetic information, gender identity, a less than honorable discharge from the military, etc. and any other status protected by federal, state or local law and regulations.***
